(54) Title: TENSIONER

(57) Abstract

The invention relates to a tensioner (2), for clamping cables, flexible pipes or bars and moving them forwards in a controlled manner, comprising at least two conveyor means (3), each intended to displace one or more clamping members (35), the shape of which is adapted to the external shape of the cables, flexible pipes or bars, and the conveyor means each being attached to a main frame element (50), all this in such a manner that the clamping members can be displaced while clamped around the cables, flexible pipes or bars, it being possible to construct tensioners in different ways with the aid of a number of standard components.
